Estimate for

43383 Stukely Dr
Sterling, VA 20166

Project Overview

This estimate covers comprehensive pack-out, transport, climate-controlled storage for two months, and final pack-in services for contents located exclusively within the basement of the origin property. A temporary staging area will be utilized within the same floor of the origin property for items not requiring off-site storage. The primary complexity factors include the need for careful handling of a large volume of documents, the disassembly and reassembly of shelving units, and the handling of a large display cabinet from the living room. Stairs are present at the origin, which will impact labor time and require specialized handling for larger items.

Contents Management & Moving Services

This estimate provides a breakdown for:

- Content Packaging, Move-out & Storage:** Includes initial on-site planning, comprehensive pack-out and inventorying, loading, transportation to storage, and 2 months of climate-controlled storage. **Note: Packing services for this project occurred over three days.**
- Retrieve from Storage to Home & Pack-in:** Includes retrieving items from storage, transportation to the destination, and final unpacking and placement of all contents.

Labor rates are applicable for services in the Mid-Atlantic region and account for specialized handling, packing expertise, and regional variations.

Basement (Origin: Pack-out & Storage)

Covers all contents located within the basement of the origin property, including shelving units, documents, binders, packed boxes, and miscellaneous office items. Also includes specialized handling for the large display cabinet from the living room. A crew of 3-4 movers will be utilized for these services.

Thank you for considering our services. We are committed to providing accurate and defensible estimates that meet industry standards and client requirements.
Please feel free to contact us with any questions or to schedule a pre-move consultation.

This estimate is based on the provided contents inventory and assumed access conditions.
All items listed in the 'Contents Inventory' will be handled. The display cabinet contents are assumed to be emptied by the client prior to our arrival. If contents are not emptied, additional labor charges for emptying and packing them will apply. The basement and living room areas are assumed to be clear of other obstructions not listed in the inventory, allowing for efficient work.
Stair access is noted and factored into labor time. Any unexpected access challenges (e.g., extremely narrow hallways, additional flights of stairs not indicated) may result in revised labor figures.
The temporary staging location is assumed to be readily accessible and sufficient for holding items not going to off-site storage.
This estimate assumes standard working hours (e.g., Monday-Friday, 8 AM - 5 PM). Work outside of these hours (evenings, weekends, holidays) may incur higher labor rates.
The final cost may vary slightly based on actual time spent, unforeseen circumstances, or changes to the scope of work. Any significant changes will be communicated and approved in advance.
This estimate does not include the cost of any repairs to the property (origin or destination) due to pre-existing conditions or damages caused by other parties.
Disposal fees for items other than our packing waste or 'other mitigation company' debris are not included.
This estimate aligns with industry standards for moving and restoration projects in the Mid-Atlantic region.
